## Imagining and Expressing

If I was to do this again, I would...

What is this the same as?  
How is it different?

A different way to look at this would be...

What ideas do you have to explain this?

The picture that I have in my head is...

Think of another way of doing it.

I know that...  
because....

The mathematical words I need to use to explain this are...

I can explain my ideas by...

I can show what I understand of this by..

- Drawing a picture
- Using the equipment
- Making a model
- Writing an explanation
- Acting it out
- Recording on an ipad my thoughts
- Solving another problem like it
